## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The rejections under 35 USC 112 have been overcome by applicant's amendment.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 & 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Durbin et al in view of Jallat et al(A) and Leder et al (B) and also in view of Todaro et al(as cited in applicant's specification).

Durbin teaches the production of STAT1 null allele transgenic mice but does not teach developing a cell line from the mice. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make a cell line from the cells of the transgenic mice of Durbin because Leder and Jallat motivate the artisan to do that and disclose how to make cell lines from transgenic mice. Additionally, the immortalization of said cell lines would have been obvious at the time the invention was made because the immortalization of cells and the

desirabilities of immortalization using such tools as SV40 is notoriously old and well known in the art.

3. Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.
